AE2S Nexus annually compiles a comprehensive survey of water, wastewater, and stormwater data for systems in Minnesota, Montana, North Dakota, South Dakota, and Wyoming. In 2016, we will be adding the state of Utah.

As a resource to assist utilities in Utah in 2016 budget planning, we are assembling 2015 rate information for Utah systems. Charts representing the cost of a monthly bill for 6,000 gallons of water/wastewater use and monthly residential stormwater charge will be developed. The target date for distribution of this information is December 18, 2015.

For an example of how this material will be presented, visit [www.ae2snexus.com](http://www.ae2snexus.com) and click on one of the links to recent articles under the heading for The Source. The Source is our quarterly electronic newsletter that addresses financial and utility rate issues, as well as highlights the results of our annual rate survey.

INSTRUCTIONS: Please complete the survey (3 pages) and fax or email as a PDF to:
